

VACCINES

Get kids ready for school — whether virtual or in the classroom — by making sure they're up to date on recommended vaccines.

Vaccines are **safe**. They're studied extensively before and after they are released.

Harmful diseases have not been wiped out, and they **can easily return**.

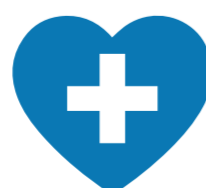

Widespread **vaccination helps protect** communities from outbreaks.

When you vaccinate your child, you also **protect vulnerable groups** such as infants and people with weakened immune systems.

**Just
the
facts**

Vaccines can **save your child's life**.
